INVESTMENT PHILOSOPHY

Coronation takes an active approach to fixed interest portfolio management with investment decisions that are driven by proprietary research across the full spectrum of potential return enhancers. Our fixed interest portfolio management approach involves interest rate management through duration and yield curve positioning. The portfolio is constructed with a long-term strategic view which is balanced by the taking of shorter-term tactical opportunities when the market lags or runs ahead of the strategic view. Coronation invests in instruments rated by reputable rating agencies and, while the fund does invest in corporate bonds, it will only do so when the yield compensates for the risk or when there is a general rise in credit spreads.

INVESTMENT TEAM

We have one of the most experienced and talented investment teams in the country operating in a culture of excellence and led by Chief Investment Officer Karl Leinberger

Our Fixed Income Team is multi skilled and complemented by extensive industry experience. Each member of the eight-person team provides key specialist input under the leadership of Mark le Roux.

Before joining Coronation in 2005 he was with Decillion where he played an integral role in the development of South Africa's first fixed interest hedge fund, the Granite Fixed Income Hedge Fund, which he also managed.
