

PORTFOLIO MANAGER COMMENTARY

The fund returned 1.4% for the quarter and 6.1% for the past 12 months.

Interest rates are at an all-time low (see graph below), with the repo rate having been at 5.5% since November 2010. Issuance in the money market has been plentiful but at much tighter spreads than a year ago. New names have entered the market, amongst them Scania and Pick n Pay which made a debut in the CP market this quarter. However, we were not participants due to the low yield at which they were issued. The focus in this interest rate environment is to correctly price for credit and to be selective enough as, should the cycle turn quickly, spreads are likely to widen again. We do not invest in instruments rated less than F1, thereby keeping the credit quality of the fund at better levels.

Source: I-Net Bridge

Local inflation data continued on its upward trend, with May CPI at 4.6%, now above the midpoint of the South African Reserve Bank's inflation target range. We expect that CPI will approach the upper end of the target range of 6% by the end of the year. With inflation heading higher, negative real short-term interest rates appear to be on the cards unless the South African Reserve Bank elects to start raising interest rates sooner. We are of the view that interest rates are too low and that they should be raised this year in order to keep inflation in check.

The fund is structured to be fully invested in its quota of SA bank floating rate notes, with a growing holding in SA Government Treasury Bills and SARB debentures. Lately the government-guaranteed instruments have been offering better value than some bank NCDs and have thus gained a renewed following from money market funds. Corporate issuer names such as Bidvest, Mercedes Benz, Barloworld, Aspen Pharmacare, and Group Five represents approximately 9% of the fund, providing some yield enhancement. However, we view credit in the money market as being largely overpriced, and thus are waiting for better value in the form of higher spreads over JIBAR before increasing it to a preferred 20%.

The price of each unit is aimed at a constant price of 100 cents per unit. The total return to the investor is primarily made up of interest received but, may also include any gain or loss made on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in an extreme case it can have the effect of reducing the capital value of the fund.

FEES (excl. VAT)

Initial Fee	Coronation: 0.00%
Annual Management Fee*	0.25%

* A portion of Coronation's annual management fee may be paid to administration platforms like LISP's as a payment for administrative and distribution services.

The fee reduced to 0.25% from 0.30% (exc. VAT) from 1 September 2010.

Total Expense Ratio (TER) ²	0.33% per annum
--	-----------------

Unit trusts should be considered a medium- to long-term investment. The value of units may go down as well as up. Past performance is not necessarily an indication of future performance. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Instructions must reach the Management Company before 2pm (12pm for the Money Market Fund) to ensure same day value. Fund valuations take place at approximately 15h00 each business day and forward pricing is used. Coronation is a Full member of the Association for Savings & Investment SA (ASISA).
¹Performance as calculated by Coronation as at 30 June 2011 for a lump sum investment using Class A NAV prices with income distributions reinvested. Performance figures are quoted after the deduction of all costs incurred within the fund. ²The TER is calculated as a percentage of the average NAV of the portfolio incurred as charges, levies and fees in the management of the portfolio for a rolling 12-month period to end March 2011. A higher TER ratio does not necessarily imply a poor return nor does a low TER imply a good return. The current disclosed TER cannot be regarded as an indication of future TER's.

Advice Costs (excluding VAT)

- An ongoing advice fees may be facilitated on agreement between the Client and Financial Advisor.
- Ongoing advice fees may be negotiated to a maximum of 0.25% per annum charged by way of unit reduction and paid to the Financial Advisor monthly in arrears. This annual advice fee is not part of the normal annual management fee as disclosed above.
- Where commission and incentives are paid, these are included in the overall costs.
