Unit trusts should be considered a medium- to long-term investment. The value of units may go down as well as up. Past performance is not necessarily an indication of future performance. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Instructions must reach the Management Company before 2pm (12pm for the Money Market Fund) to ensure same day value. Fund valuations take place at approximately 15h00 each business day and forward pricing is used. Coronation is a Full member of the Association for Savings & Investment SA (ASISA). ¹Performance is quoted from Morningstar as at 30 April 2010 for a lump sum investment using Class A NAV prices with income distributions reinvested. Performance figures are quoted after the deduction of all costs incurred within the fund. ²The TER is calculated as a percentage of the average NAV of the portfolio incurred as charges, levies and fees in the management of the portfolio for a rolling 12-month period to end March 2010, as well as the actual performance fee incurred over the 12 months to end March 2010. A higher TER ratio does not necessarily imply a poor return nor does a low TER imply a good return. The current disclosed TER cannot be regarded as an indication of future TER's.
