

LONG TERM OBJECTIVE

The Coronation Emerging Markets Ex-China Strategy provides access to what we consider to be the best investment opportunities in emerging markets outside of China. It aims to deliver long-term capital growth through a focused equity portfolio of securities of companies based in emerging markets outside of China or those deriving a significant portion of their business from emerging economies outside of China. The strategy aims to outperform the MSCI Emerging Markets ex-China Index over periods of 5 years and longer.

INVESTMENT APPROACH

Coronation is a long-term, valuation-driven investment house, focused on bottom-up stock picking. Our aim is to identify mispriced assets trading at discounts to their long-term business value (fair value) through extensive proprietary research. In calculating fair values, through our fundamental research, we focus on through-the-cycle normalised earnings and/or free cash flows using a long-term time horizon. The Portfolio is constructed on a clean slate basis based on the relative risk-adjusted upside to fair value of each underlying security and their expected Internal Rate of Return (IRR). The Portfolio is constructed with no reference to a benchmark. We do not equate risk with tracking error, or divergence from a benchmark, but rather with a permanent loss of capital.
