

WHAT IS THE FUND'S OBJECTIVE?

The fund seeks to maximise long-term capital appreciation by investing primarily in a broad spectrum of listed equities.

WHAT DOES THE FUND INVEST IN?

The Equity Fund invests in the shares of companies listed on the Johannesburg Stock Exchange. The fund can also invest 25% in international equities, plus a further 5% in Africa (outside of South Africa).

There are no restrictions on how much exposure the fund can have to different sectors (for example, to mining, financial or industrial companies).

The fund will be fully invested in shares at all times. The fund is mandated to use derivative instruments for efficient portfolio management purposes.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Risk Profile

Maximum growth/
minimum income exposures

The fund's managers actively seek out attractively valued shares that could achieve strong investment growth over the long run. Rigorous research is conducted into the long-term potential of a company and whether it is attractively valued relative to other companies, before its shares are selected for the fund.

Shares can be volatile investments and there is a meaningful risk of capital loss over the short term. However, given its focus on attractively valued shares that could offer long-term growth, the Equity Fund may preserve capital better than its benchmark over the long run.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- are comfortable with full exposure to shares listed in South Africa;
- accept that the fund may underperform the market in the short term in pursuit of superior long-term gains.
- do not require an income in the short term.
- The fund is less concentrated than the Coronation Top 20 Fund, making it more suitable for investors holding only one equity fund.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of a minimum of 0.75% and a maximum of 2.60%, depending on the fund's performance, is payable.

If the fund's return (after fees and costs) is equal to that of the benchmark, a fee of 1.10% will be charged. We share in 20% of the performance above the benchmark, up to a total annual fee of 2.60%. Performance is measured over a rolling 24-month period.

When the fund return is below the benchmark over a rolling 60-month period the fee is discounted by 0.35%.

All fees exclude VAT. Fund expenses that are incurred in the fund include trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund.

Please note that the commentary is for the retail class of the Fund.

The Fund returned 7.2% for the quarter, resulting in a return of 22.1% over the last year. The Fund has performed well against its peer group over all meaningful time periods.

It was another strong year for global markets as the MSCI All Country World Index ended the year up 19% in USD. Markets shrugged off the rise in infections caused by the Omicron variant to deliver a 7% rise in the fourth quarter (Q4-21), including 4% in December.

Emerging markets performed poorly, with the MSCI Emerging markets (EM) Index declining -3% in USD. This was materially impacted by China, where government regulation of the economy has become increasingly intrusive and capricious. While the risks are high, Chinese technology stocks trade at extremely attractive valuations. The Fund is exposed to China through both its global equity allocation as well as its domestic equity allocation where it holds Naspers/Prosus and commodity stocks.

The Fund's allocation to global equities has bolstered both returns and risk management over the longer term. However, performance was disappointing in this calendar year as a consequence of the Fund's holding in selected Chinese stocks and its holding in several high-quality, growth companies that sold off late in the year as part of a market rotation from growth into value. We view these holdings as very cheap and believe they offer an attractive risk-reward profile.

The largest Chinese investment among the global holdings is JD.com, which we believe to be an extremely well-positioned company. JD.com has responsible social practices and has consistently invested in distribution to widen services into Tier 2 and 3 cities. It also is a meaningful beneficiary of industry regulation that will prohibit many of the anti-competitive practices pursued by Alibaba over the years. We expect the business to grow strongly, with expanding margins and strong free cash flow generation. We spoke earlier in 2021 about the Fund's investment in Auto 1. Like many long duration growth stocks that retreated during last year in the face of rising global interest rates, Auto 1's share price performance thus far has been disappointing. However, we continue to believe in the intrinsics of the business model. Auto 1 has a cost-efficient direct-from-consumer sourcing model, superior transactional pricing data, and a growing retail business. We expect this to deliver sustained market share gains for many years from a fragmented used car retail industry. We added to the position during the quarter.

The South African (SA) economy is recovering after the deep recession of 2020. The economy is forecast to return to its pre-Covid levels in 2022, a year earlier than previously expected. This better economic performance, combined with improved governance and a commitment to fiscal sustainability, should be sufficient for SA to navigate its fiscal challenges for the next few years. The improved fiscal situation was reflected in the upgrade by Fitch Ratings of SA's credit rating outlook from negative to stable. Longer term, economic growth remains critical to avoid a debt trap. Challenges include unstable power supply, structurally high unemployment, a poor education system, declining productivity, and slow policy reform. High levels of social inequality and unemployment came to the fore in Q3-21 with the outbreak of looting across KwaZulu-Natal. The rand declined -8.5% against the USD for the year (-5.8% for Q4-21).

Like global markets, local markets ended the year strongly, with the JSE Capped SWIX Index delivering 9% in rands in Q4-21 to end the year up 27%. We believe SA equities are cheap, given the breadth of value across sectors, including resources, global stocks that are locally listed and domestic shares. There was broad strength, with the resource sector delivering 32% for the year (22% for the quarter), financials 30% (3% for the quarter) and industrials 26% (16% for the quarter) despite the pressure on major constituent Naspers (-18% for the year and -1% for the quarter).

Within the resources sector, holdings in the diversified miners (Glencore +80% for the year and Anglo American +46% for the year) have contributed strongly to performance over the past few years. Strong demand, driven by recovering economies and decarbonisation, along with disciplined capital expenditure have supported tight markets. The diversified miners continue to offer good value with low multiples and solid free cash flow generation. During the year, proceeds from the PGM shares were recycled into gold equities (AngloGold and Goldfields) which offer upside and reasonably priced protection against stretched sovereign balance sheets and the risk of structurally higher inflation. Both have improved their production profiles and geographic diversification. We anticipate a period of increased returns to shareholders under their new leadership teams.

The Fund has meaningful exposure to several global businesses that are listed in SA. These include Naspers (-18% for the year, -1% for the quarter)/Prosus (-18% for the year, +9% for the quarter), British American Tobacco (+16% for the year, +13% for the quarter), Bidcorp (+26% for the year, +2% for the quarter), Quilter (+6% for the year, +9% for the quarter), Textainer (+103% for the year, +8% for the quarter) and Aspen (+81% for the year, -17% for the quarter). Aspen is negotiating a potentially accretive disposal of its API business and a vaccine licensing deal from J&J to supply the African Union. The weaker fourth quarter return from Aspen reflects high expectations at the onset.

The Fund has a considerable holding in Naspers/Prosus that we believe to be materially undervalued. This is because of the low value being attributed directly to Tencent and the discounts which exist at the holding company level. The investment risk has increased with China's regulatory interventions and the threat to foreign capital. Thus far, regulations affecting technology companies are broadly consistent with what we see elsewhere, covering fintech, Antitrust law, data security, and gig employee labour protection. Tencent is a formidable company that generates good free cash flows, has a very engaged user base and is growing businesses across multiple verticals. None of the restrictions thus far are expected to meaningfully change Tencent's prospects. An investment in Naspers/Prosus offers a cheap entry point to Tencent and provides access to an attractive investment portfolio.

Disappointingly, the Fund sold down its investment in MTN (+184% for the year, +21% for the quarter) too early. Whilst we were believers in the operational turnaround, we were very concerned about the outlook for the Nigerian economy and the regulatory risk within Nigerian Telecoms. Improved stakeholder relations and the likely conclusion of a mobile money licence in Nigeria support future earnings growth, and we have re-established a holding in the company.

Domestic companies continued to report results ahead of our expectations throughout 2021 due to more resilient economic activity and stringent cost control. We believe attractive stock picking opportunities exist either from businesses with specific opportunities like Dis-Chem (+71% for the year, +20% for the quarter), RMI (+43% for the year, +21% for the quarter) or Transaction Capital (+83% for the year) or even in more mature industries like banking or food retail where those with strong franchises that have continued to invest should benefit from share gain. Shoprite (+54% for the year, +17% for the quarter) demonstrated this during the fourth quarter by surprising the market with the strength of their sales growth. This is a management team that has invested behind their business, building distribution centre capacity, updating systems and embracing digitisation. Their progress in building out a data-driven business built around the consumer is impressive.

RMI has been restructuring to create a focused property and casualty insurance company. The restructuring initially announced should unlock shareholder value as the unbundling of holdings in MMI and Discovery reduces the conglomerate discount and improves investor focus on the underlying assets (specifically OUTsurance). OUTsurance is a quality business that we expect to deliver double-digit earnings growth while generating high returns. The attractiveness of the restructuring proposal was increased during the quarter when RMI received a generous offer for their stake in Hastings. The resultant cash inflow and associated degearing will enable RMI to avoid the rights issue required to achieve the initial unbundling and improve the dividend flowthrough from the very cash generative OUTsurance business. Despite the share price moves during the quarter, this remains an attractive investment with the core OUTsurance asset trading at a low look-through multiple relative to its high-quality nature and strong growth prospects, particularly in Australia.

Whilst headwinds exist in both global markets and the domestic economy, we believe domestic assets are well priced for the risks and should offer attractive returns off these low starting prices.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION EQUITY FUND

The Equity Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. Asset allocation and top 10 holdings are reflected on a look-through basis. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Portfolio managed by Coronation Asset Management (Pty) (FSP 548) Ltd, an authorised financial services provider. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Standard Chartered has been appointed as trustees for the fund (www.sc.com/za; 011-2176600). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. Class R NAV prices were used for the period prior to the launch of Class A. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

From 1 April 2021 to 31 March 2022, the lowest of the performance-adjusted fee calculated using CAPI or C-SWIX as the SA Equity component of the benchmark will be accrued daily. From 1 April 2022, only the performance-adjusted fee calculated using C-SWIX as the SA Equity component of the benchmark will apply.

The peer group average is calculated as the average return of all the funds in the respective ASISA category (excluding Coronation Funds in that category)

HOW ARE THE BENCHMARK RETURNS CALCULATED?

The benchmark used for performance purposes is a composite benchmark consisting of 87.5% Domestic Equity (CSWIX), 12.5% International Equity (ACWI).

From 1 April 2021 the SA equity component of the composite benchmark is the FTSE/JSE Capped Shareholders Weighted All Share Index (C-SWIX) which replaces the FTSE/JSE Capped All Share Index (CAPI). The benchmark returns shown in this MDD will be spliced between the performance of the previously applicable index values and that of the new composite benchmark using C-SWIX from 1 April 2021.

Note that we use the formal SA – Equity – General category benchmark as specified in the ASISA Standard on Fund Classification, which is currently the FSTE/JSE All Share Index, for compliance monitoring purposes

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the current financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on our website, www.coronation.com
