

WHAT IS THE FUND'S OBJECTIVE?

Global Capital Plus is in the first instance managed to achieve reasonable investment growth over time. Our intent is that the fund should meaningfully outperform an investment in developed market cash over time. In addition, we aim to preserve capital over any 12-month period.

WHAT DOES THE FUND INVEST IN?

Global Capital Plus can invest in all listed asset classes including shares, listed property, bonds and cash. The fund will primarily have exposure to developed economies (including the US, Europe and Japan) but can also invest in emerging markets.

The fund is managed to suit the needs of more conservative investors who want to invest for longer than three years. Exposure to growth assets (shares and listed property), which pose more risk than income assets, will typically not exceed 50%.

The intent is to keep the fund fully invested in foreign assets at all times. While the underlying exposure in this class is to diversified assets across international markets, all returns are fully hedged back into UK Pound Sterling.

The fund is allowed to make use of exchange traded funds and financial instruments to implement its investment views.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Capital Plus aims to protect capital over any 12-month period in all market conditions, while offering real investment growth over the long term. However, capital is not guaranteed.

The fund invests in a broad range of different assets and many countries.

Its exposure to shares, which offer the best long-term investment growth, could help maximise returns. However, with this long-term growth comes short-term volatility, which may affect the fund's returns. This risk is mitigated to some extent as growth asset exposure will not exceed 50%.

Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

An investment term of more than three years is recommended.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- seek a single international investment that will give them access to some of the best opportunities around the globe, while aiming to protect their capital;
- require conservative exposure to offshore markets;
- do not require an income from their investment.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.15% is payable. This fee is applicable from 1 October 2025 and was reduced from 1.25% with effect from that date.

Fund expenses that are incurred in the fund include administrative, trading, custody and audit charges. Performance information is disclosed after deducting all fees and other portfolio costs.

We do not charge fees to access or withdraw from the fund. All fees exclude VAT.

Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

More detail is available on www.coronation.com.

CURRENCY ALLOCATION

Currency as at 30 Nov 2025	
UK Pound Sterling	100%

This fund is available in 3 hedged currency classes (Euro, Pound Sterling & US Dollars) as well as a Houseview currency class. This is the fact sheet for the Pound Sterling hedged currency class.

Please note that the commentary is for the retail class of the Fund.

The stock market recovery post April's tariff tantrum continued in Q3 with the MSCI All Country World Index advancing 8%. Bond market returns (as measured by the Bloomberg Barclays Global Aggregate Bond Index) were fairly muted, with a 1% gain. Perhaps most notable was the broad-based market strength in the face of much macro consternation, combined with a geographic broadening of returns: Developed Markets ex-US and Emerging Markets are both more than 10% ahead of the S&P 500 Index year-to-date (YTD). The Fund had a solid quarter, bringing the return for the last twelve months to 11.6% compared to 6.0% for the benchmark (SOFR + 1.5%). The Fund has performed well over all meaningful periods.

At quarter-end, the portfolio was positioned as follows:

- 14% in short-dated US T-bills
- 21% in developed market government bonds
- 22% in investment-grade corporate bonds
- 10% in US inflation-linked bonds
- 4% in high-yield fixed income
- 5% in real assets (listed infrastructure and property)
- 24% effective equity

Our fixed income positioning remains conservative. The Strategy's duration of approximately one year is far shorter than that of the global bond aggregate index's 6 years. The Strategy's yield to maturity (YTM) of 4.8% compares favourably, both to inflation expectations and the index's 3.5%. With credit spreads in both the investment grade and high yield markets at low levels, we believe now is not the time to be reaching for yield.

With global stock market returns being driven by a small number of US-listed, large capitalisation technology shares over the last few years, it was very pleasing to see this continued broadening out of market returns. Since early 2024, we have argued that increasingly narrow global stock markets have resulted in large parts of the market being totally ignored by investors. This has created a diversified opportunity set – across sector, style, and geography – for us as long-term focused, active stock pickers. While we admire many US businesses and still find select value there, we find the current opportunity set outside the US more attractive. The Fund's US weight is directionally in line with our global equity strategy, as shown in the graph on the right.

Figure 1
CONTINUING TO FIND OPPORTUNITIES OUTSIDE OF THE US

Last quarter, we discussed the emerging market (EM) trio of winning businesses Coupang, Nubank, and Sea Ltd. These companies have a history of strong innovation, having leveraged their leading platforms into new services and revenue streams, with strong growth outlooks underpinned by multiple structural tailwinds. And this quarter, four of the top 15 contributors were from emerging markets, with the list including Nubank, the abovementioned leading digital bank in Latin America; Taiwan Semiconductor Manufacturing Company (TSMC) which designs and manufactures nearly all of the world's most advanced semiconductor chips, holding a near-monopoly on the leading-edge process technology that powers AI innovation and cutting-edge computing; and Grab Holdings, which holds a dominant position in South East Asian ride-hailing alongside a strong presence in food delivery and fintech. Each of these businesses is on the right side of technological change, with a strong multi-year growth outlook that is superior to US-based peers, whilst trading at a fraction of the relative valuation.

With global stock markets also increasingly volatile, we continue to believe that frequent and extreme price dislocations are creating significant opportunities for investors who focus their research on company fundamentals. These opportunities still emerge even within the arguably "expensive" US market. Warner Bros Discovery, a company we have owned for nearly three years was the largest contributor in the quarter, is one such example. Warner Bros. Discovery is a US-listed media company consisting of three distinct businesses. Its growth assets include the critically acclaimed HBO Max streaming platform, which is behind hit shows like Game of Thrones and The White Lotus, and the Warner Bros. Studio, which owns valuable IP such as Superman and Harry Potter. It also owns a collection of linear TV networks that are in structural decline but still contribute significantly to earnings and cash generation. As a result of a still hefty, but declining and manageable debt load as well as exposure to declining linear networks, the market largely ignored the combined entity, which traded on a single-digit PE multiple. But this has now changed. First, the company announced that it would split into two separate entities to better highlight the value in its growth assets. And then in early September, it emerged that the Ellison-backed Paramount Skydance Corporation was exploring a bid for the whole company, sending shares up 50% plus over two days.

Mercado Libre, the leading ecommerce and fintech player in Latin America, was a new purchase in the quarter. The share declined 10% over the period due to concerns over Argentina's economy (its third-largest market by sales, but more in terms of profits) and increased competitive intensity in Brazil. Whilst cognisant of these risks, it is worth remembering that Mercado Libre has grown strongly through many economic cycles, as evidenced by exceptional revenue growth of 45% per annum in USD over the last decade. And in Brazil specifically, it has an extremely strong competitive position thanks to its synergistic ecosystem that includes ecommerce, payments, and credit, and continues to grow its market share in the Brazilian ecommerce market. We continue to be attracted to its long growth runway, with ecommerce and credit penetration remaining very low in its geographies. We took advantage of the recent weakness to add to our position.

It was also pleasing to see strong contributions from Thermo Fisher Scientific and UnitedHealth. We had written about our healthcare holdings in Q2:

"Our healthcare holdings, which span the life sciences, health insurance, and healthcare equipment sectors, underperformed this quarter, largely due to growing uncertainty around potential regulatory changes in the US. The Trump administration has proposed cuts to healthcare programmes, including reductions to government and academic funding, the FDA, and Medicaid. They have also implemented tariffs that affect the cost of drugs and medical equipment manufactured abroad. More recently, President Trump signed an executive order aimed at reducing US drug prices, which are currently about three times higher than in other developed markets. Most pharmaceutical companies earn the bulk of their profits in the US, and therefore, this change is raising concerns about how future innovation will be funded. These regulatory developments are adding a cloud of uncertainty over R&D spending and capital investment across the healthcare sector.

We believe market reactions have overshot the likely impact of these potential changes. We remain confident in our selected healthcare holdings and believe they are well-positioned across global supply chains, customer bases, and/or product portfolios to not only navigate these changes but also gain market share in the process."

Approximately 13 country benchmarks hit all-time highs in Q3. And while the upside in our equity portfolio is lower than at the depths of the market sell-off in April, we still see an attractively valued portfolio that is diversified across geographies and sectors, and importantly, the composition of the equity portfolio remains high quality, with over 90% of the equity bucket comprised of winning businesses. Our conservative fixed income positioning and relatively low equity weighting provide ample dry powder to take advantage of dislocations in either of the two key asset classes.

Thank you for your support and interest in the Fund.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL CAPITAL PLUS FUND

The Global Capital Plus Fund should be considered a medium- to long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top 10 holdings are reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation Investment Management International (Pty) Ltd (FSP45646), an authorised financial services provider. JP Morgan SE (Dublin Branch) has been appointed as the fund's trustees and its custodian (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) to ensure the value of the same business day. You can expect to receive withdrawal payouts three to four business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using GBP Hedged Currency Class A NAV prices. All underlying price and distribution data are sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

HOW ARE THE BENCHMARK RETURNS CALCULATED?

The benchmark used for performance purposes is the Sterling Overnight Index Average (SONIA) + 1.5%. From 1 December 2021 the benchmark changed from the 3-month GBP LIBOR + 1.5% to the Sterling Overnight Index Average (SONIA) + 1.5%. The benchmark returns shown in this MDD will be spliced between the previously applicable index values and the new benchmark from 1 December 2021.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction. The Prospectus of Coronation Global Opportunities Fund and Fund KIID can be sourced on the following link: <https://www.coronation.com/en/institutional/strategy-information/literature/ucits-fund-library/umbrella-fund>. A summary of Investor Rights can be sourced on the following link: <https://www.coronation.com/en/institutional/about-us/ucits-v-disclosure/>.
