

## WHAT IS THE FUND'S OBJECTIVE?

Capital Plus is in the first instance managed to achieve reasonable investment growth over the medium to long term. Our intent is that the fund should produce an annualised return of at least inflation plus 4% over time. In addition, we aim to preserve capital over any 18-month period. It is specifically managed to suit investors who want to draw an income over an extended period of time.

## WHAT DOES THE FUND INVEST IN?

Capital Plus can invest in a wide range of assets, such as shares, bonds, listed property and cash, both in South Africa and internationally. As the fund actively seeks to curb risk and volatility, only a maximum of 70% of its investments may be held in growth assets like shares and listed property. Shares usually offer the best growth, but this comes with the greatest risk of short-term losses. The fund's exposure to shares is therefore carefully balanced with more stable investments like bonds. Maximum exposure to foreign assets is 30% (excluding Africa). The fund is mandated to use derivative instruments for efficient portfolio management purposes.

## IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

The fund is tactically managed to protect and grow capital, as well as secure an attractive income. A large and experienced investment team actively seeks out the best potential opportunities for income and growth, while carefully considering the different risks within the fund.

Capital Plus is specifically managed to reduce the probability of losing money over any 18-month period, although it cannot guarantee protection against losses.

The fund is diversified across a range of assets reflecting its dual objectives of reasonable growth and capital stability. This includes a selection of shares we believe are attractively valued and may offer strong long-term returns, as well as strategic positions in quality income assets.

## HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The recommended investment term is three years and longer. The fund's exposure to shares may result in short-term price fluctuations, making it unsuitable to investors who can only invest for short periods.

## WHO SHOULD CONSIDER INVESTING IN THE FUND?

- Pensioners and other investors requiring an income, especially those in the first half of retirement.
- Living annuity investors seeking a fund that aims to achieve both income and capital growth.
- Investors requiring a low-risk fund, which offers a reasonable rate of return, for their retirement annuity, provident fund, preservation fund or pension fund.
- Conservative investors who want to protect their savings.
- Trusts, endowments, foundations and charities who require long-term funding of a moderate spending rule.

## WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.25% is payable.

The fund will discount to 0.75% p.a. for negative performance over a rolling 24-month period until 30 September 2018, thereafter the discount will fall away. The annual management fee is accrued daily and paid monthly.

Fund expenses incurred in the fund include fees payable to unconnected international fund managers on a portion of assets situated offshore as well as trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund.

***Please note that the commentary is for the retail class of the fund.***

The past quarter was marked by a major reversal in investor sentiment towards emerging markets. Emerging currencies, bonds and equities all succumbed to immense pressure as global investors derisked their portfolios. It is not easy, even in hindsight, to say exactly what triggered the exodus. But it is likely the stronger US dollar, higher US bond yields, an expectation of further rate hikes in the US, as well as in Europe, and all the talk of trade wars started by the Trump government combined to generate enough bad news flow to spook investors.

South Africa did not escape this global trend. The rand lost 14% of its value relative to the dollar and bond yields surged as foreigners offloaded a massive R65bn of government bonds over the quarter. The JSE saw a major shift in sentiment too with domestic orientated shares under selling pressure while rand hedges were protected as expected in turbulent times.

In terms of the fund's mandate to achieve an inflation plus 4% return while at the same time preserving capital, we manage the portfolio as though some bad news may always occur. The offshore holdings of 26% at the start of the quarter, a healthy exposure to rand-hedged shares and a low modified duration in the bond portion of the portfolio all helped to protect the fund against the selloff. The result is a credible return of 4.1% over this eventful quarter. The one-year performance is 6.0%, the three-year return is 4.6%, over five years it is 7.1% and the 10-year number is 10.0% per annum. Inflation ranged between 4.8% over the past year to 5.5% over the last 10 years. Our aim to beat inflation by 4% per annum was therefore attained over the long term but not over the three- and five-year periods.

The wild gyrations in the market gave us the opportunity to make some meaningful changes to the composition of the fund. The rise in yields of government bonds to levels between 9% and 10%, depending on its duration, is particularly attractive to funds such as this with a target of beating inflation by 4%. Inflation is expected to average between 5% and 6% over the long term. Buying bonds at these attractive real yields was therefore an opportunity that we did not want to miss out on. We added to our South African bond holdings taking it from 15.7% to 18.8% of the fund (excluding inflation-linked bond exposure of 9.2%). In order to buy the bonds we used the rand weakness to lighten our global exposure from 26% to 23% as we sold units in the Global Capital Plus Fund.

Within the domestic equity portion of the fund, we trimmed our position in Mondi as this high quality company's share now offers limited upside following its stellar performance. We added to Standard Bank, Naspers, Bidcorp and added newly-listed share Quilter ahead of its unbundling from Old Mutual. Quilter is a UK-focused integrated wealth manager. The UK savings market is attractive due to recent pension reforms which gives individuals more control over their retirement savings. This has increased the need for financial advice. Quilter is well placed with the second largest advice force and platform in the UK.

Over the short term, the negative attitude to emerging markets may well persist for a while. However, the high real yields available in the bond market as well as the derating of many domestic shares to attractive levels make us more optimistic of reaching our goal of beating inflation by at least 4% over rolling three-year periods.

## IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION CAPITAL PLUS FUND

The Capital Plus Fund should be considered a medium- to long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The fund is mandated to invest up to 30% (including a maximum exposure of 5% to Africa, excluding South Africa) of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Asset allocation and top 10 holdings are reflected on a look-through basis. Any African exposure (ex SA) is reflected under international assets. The fund is managed in line with Regulation 28 limits, although it is not required as per the fund's supplemental deed. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Portfolio managed by Coronation Asset Management (Pty) (FSP 548) Ltd, an authorised financial services provider. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Standard Chartered has been appointed as trustees for the fund ([www.sc.com/za](http://www.sc.com/za); 011-2176600). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

## HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

## HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

## WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of September 2017 (updated annually). The 3 year TER is for a rolling 36-month period to the last quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

## ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

## WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on our website, [www.coronation.com](http://www.coronation.com)
