

WHAT IS THE FUND'S OBJECTIVE?

Global Equity Select aims to give investors access to the best opportunities in global equity markets. The fund is biased to developed markets and actively seeks out attractively valued shares to maximise long-term growth. Our intent is to outperform the global equity benchmark over all periods of five years and longer.

WHAT DOES THE FUND INVEST IN?

The fund invests in the shares of companies listed on equity markets around the world. The fund has a bias towards developed markets, typically holding at least 70% in developed market shares and up to 30% invested in shares listed in emerging markets. While our intent is to remain fully invested in shares, the fund is allowed to hold up to 20% of its portfolio in cash and bonds.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Equity Select will only invest in shares we view as being attractively valued relative to other shares which may offer superior long-term investment growth.

The fund's share selection is the result of rigorous international research conducted by Coronation's investment team.

While we have a disciplined approach to reducing risk, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- are comfortable with full exposure to shares listed in global markets outside South Africa;
- accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- hold other investments and are looking to add exposure to global equity markets;
- do not require an income from their investment.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of a minimum of 0.70% and a maximum of 2.30%, depending on the fund's performance, is payable.

If fund performance equals that of the benchmark (after fees and costs), a fee of 1.05% will be charged. We share in 20% of performance above the benchmark, up to a total annual fee of 2.30%. Performance is measured over a rolling 24-month period.

When the fund return is below the benchmark over a rolling 60-month period the fee is discounted by 0.35%.

Fund expenses that are incurred in the fund include administrative, trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.

We do not charge any fees to access or withdraw from the fund.

More detail is available on www.coronation.com.

Please note that the commentary is for the retail class of the fund.

Our previous quarterly report highlighted the almost ominously low levels of volatility as evidenced in the length of the bull market (without a technical pull back), the fact that calendar 2017 showed no negative monthly returns (a market first), and the very low levels of implied volatility when buying options. The first quarter of 2018 however shattered this level of complacency. While the year started with a very strong January, a combination of the re-assessment of interest rate levels over the next few years, aggravated by some inflationary pressures, as well as a renewed focus on the privacy debate pertaining to the new technology giants (on the back of some data manipulation claims against Facebook) led the equity market into a new era of volatility. Both February and March produced negative returns, and moving into April the market flirted with the 10% retracement level that would constitute a technical correction. The more recent market jitters have been in response to the increasing probability of a US/China trade war.

The quarterly return for the MSCI All Country World Index (ACWI) was negative 1.0%. Surprisingly, emerging markets outperformed developed markets, producing a return of 1.4%. The rolling 12-month return for the ACWI remains impressive at 14.9%, surpassed by an emerging markets return of 24.9%. The ACWI's five-year annualised return is also reasonable (9.2% p.a.), this time exceeding that of emerging markets (5.0% p.a.). Sectors that outperformed over the last quarter include information technology (ironically, given the recent pressure on Facebook and some of the other industry giants) and consumer discretionary. Materials and energy predictably performed poorly given the change in interest rate outlook, but it also adversely affected consumer staples, which sold off with the increase in longer term bonds (having erroneously been considered as bond proxies during the search for yield a few years ago). The US marginally outperformed the developed markets grouping, but continued currency weakness resulted in US dollar returns being very similar across different markets.

The fund had a disappointing start to the year, underperforming its benchmark by nearly 5.3% for the quarter. This has affected our longer-term numbers, with the fund lagging its benchmark since inception and over the three-year period.

Our biggest positive contributors included Amazon (continued rerating on the back of sound execution and speculation about entering other categories), Advance Auto Parts (turnaround strategy gaining early traction after oversold share price), Hammerson (an unexpected bid for the company being rebuffed by the Board), and Airbus (a recent portfolio introduction continuing to execute well). The largest detractor was the prior quarter's top performer – L Brands. This after a poor trading statement resulted in its share price retreating to previous lows. Other losers included Altice (cable operator with poor results in its home market, France), Tata Motors (victim of market volatility and poor short-term sales numbers), and Intu Properties (fears that proposed Hammerson deal would fall through). Some of our consumer staple holdings were also marked down in line with the comments above.

We have significantly increased our portfolio exposure to tobacco stocks over the last 12 months. Currently close to 10% of the fund is invested in stocks such as British American Tobacco, Philip Morris International, Japan Tobacco and Imperial Brands. While each company potentially offers a slightly different angle in terms of future returns, the overarching investment thesis is that the development of next generation products (while disruptive to the incumbent players in what has been a very stable industry) could prove to present the market with a new growth vector. Heat-not-burn and vapour products have found favour with both existing smokers, as well as ex-smokers, and allow the industry to benefit from premium pricing. The recently announced Food and Drug Administration's review of the industry in America has increased uncertainty in the shorter term, allowing us to pay what we would consider to be attractive prices for these stocks. In the longer run, we anticipate the larger players to consolidate the new technologies, leading to improving margins compared to the combustible market (assuming no adverse tax developments). Some of these companies are now trading at valuation multiples not far off those levels when they were facing potentially crippling financial legal claims, and we think these positions will serve the fund well over the medium to longer term.

While the fund's short-term performance has been a disappointment, we take encouragement from the fact that the portfolio is showing very attractive potential upside based on our assessment of fair value for our individual holdings.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL EQUITY SELECT FUND

The Global Equity Select Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation Investment Management International (Pty) Ltd (FSP45646), an authorised financial services provider.

Northern Trust Fiduciary Services has been appointed as the fund's trustees (www.northerntrust.com; t: +353-1-542-2000), and its custodian is JP Morgan Administration Services (Ireland) Limited (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) one day prior to the dealing date. You can expect to receive withdrawal payouts three business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of September 2017 (updated annually). The 3 year TER is for a rolling 36-month period to the last quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.

IMPORTANT INFORMATION REGARDING TERMS OF USE
