

WHAT IS THE FUND'S OBJECTIVE?

The fund aims to maximise long-term growth from investing in a select group of resource companies. It seeks to outperform an index of resource companies listed on the Johannesburg Stock Exchange (the JSE Resources Index) over the longer term.

WHAT DOES THE FUND INVEST IN?

The fund will remain fully invested in a broad range of resource and basic materials industry shares that are affected by changes in the commodity cycle. This includes companies involved in mining, minerals, energy, natural resources and other commodities. The fund is mandated to use derivative instruments for efficient portfolio management purposes.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

The fund's managers actively seek out attractively valued companies that could offer strong long-term growth. The fund reflects Coronation's best investment views in the resource sector.

Shares are selected following rigorous research into the long-term potential of a company. Shares can be volatile investments, and the cyclical demand for commodities can add to the risk of capital loss.

The fund is concentrated and only invests in one sector of the market, making it riskier than a general equity fund.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of five years or more is therefore ideal.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth and

- want to diversify their investments to include specific exposure to the resource sector;
- believe that resource shares offer compelling value;
- accept the cyclical nature of commodity demand and the resulting increased risk of short-term losses;
- want to hold the Resources Fund as one of multiple funds in their investment portfolio.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.00% (excl. VAT) is payable.

Fund expenses that are incurred in the fund include trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.

We do not charge fees to access or withdraw from the fund.

More detail is available on www.coronation.com.

WHO IS THE FUND MANAGER?

The resources sector had a very strong third quarter. The fund returned 9.1%, while the benchmark returned 5.2%. The long-term track record of the fund remains compelling, with the fund performing well against both its peer group and the benchmark over most meaningful periods.

Over the last quarter, the fund benefitted from overweight holdings in Exxaro and the platinum group metals stocks. Overweight holdings in Trencor and Omnia detracted.

During the quarter, we added to our holdings in Anglo American and BHP Billiton. We reduced holdings in Sappi, Mondi, Exxaro and the Platinum Exchange Traded Fund.

BHP Billiton owns large, low-cost assets in iron ore, copper, oil and coal. As a result of healthy commodity prices, combined with restrained capital expenditure (miners still bear the scars from the last down cycle), we expect BHP Billiton to generate meaningful free cash flow in the coming years. We expect a material portion of this will be returned to shareholders, along with the proceeds of their shale gas asset disposal.

News flow over the quarter was dominated by trade wars and, locally, the Mining Charter. The threat of trade wars caused some worry around commodity trade and commodity prices. Our view is that the long-term impact is unlikely to be too material, especially for commodities capable of being rerouted, which is generally the case. Factors such as global population growth and urbanisation are likely to have a greater impact on demand.

The Mining Charter has seen a further revision. This revision is more palatable than the previous iterations, although concerns do remain. On the positive side, the “once empowered, always empowered” rule has been confirmed and the requirement to top up BEE ownership from 26% to 30% for existing mining rights has been removed. For new mining rights, changing the 10% free carry for employees and communities to a 10% carried interest, as well as the removal of a 1% of EBITDA trickle dividend is a positive. The removal of ownership requirements on prospecting rights should aid exploration activity. On the negative side, applying the more onerous new mining rights criteria when assets are sold or renewed, will possibly act as an impediment to new investment and mergers and acquisition activity. Procurement targets remain onerous and will add to the cost of mining.

While the external environment is challenging, we strive to ignore this and remain committed to our disciplined, valuation-driven approach to stock picking and portfolio construction. We still think the resources sector remains attractive, with reasonable upside in most of the stocks within the portfolio.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION RESOURCES FUND

The Resources Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The fund is mandated to invest up to 25% (excluding Africa) of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Asset allocation and top 10 holdings are reflected on a look-through basis. Any African exposure (ex SA) is reflected under international assets. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Portfolio managed by Coronation Asset Management (Pty) (FSP 548) Ltd, an authorised financial services provider. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Standard Chartered has been appointed as trustees for the fund (www.sc.com/za; 011-2176600). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class P NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of September 2017 (updated annually). The 3 year TER is for a rolling 36-month period to the last quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on our website, www.coronation.com
