

## LONG TERM OBJECTIVE

The Coronation Global Frontiers Strategy aims to maximise the long-term risk-adjusted returns from investments across global frontier markets through capital growth of the underlying stocks selected. It is a flexible portfolio primarily invested in listed equities. The Strategy may hold cash and interest bearing assets where appropriate.

## INVESTMENT APPROACH

Coronation is a long-term, valuation-driven investment house, focused on bottom-up stock picking. Our aim is to identify mispriced assets trading at discounts to their long-term business value (fair value) through extensive proprietary research. In calculating fair values, through our fundamental research, we focus on through-the-cycle normalised earnings and/or free cash flows using a long-term time horizon. The Portfolio is constructed on a clean-slate basis based on the relative risk-adjusted upside to fair value of each underlying security. The Portfolio is constructed with no reference to a benchmark. We do not equate risk with tracking error, or divergence from a benchmark, but rather with a permanent loss of capital.
