

INVESTMENT OBJECTIVE

The Coronation Granite Hedge Fund is managed as a long/short fixed income fund, investing in a diversified portfolio of securities, including derivative instruments, bonds and cash. The Coronation Granite Hedge Fund makes use of six core and distinct fixed income strategies, namely: Directional View Taking, Yield Curve Positioning, Corporate Credit Opportunities, Arbitrage Strategies, Quantitative and Relative Value Trades in the pursuit of producing consistent absolute returns independent of general market direction.

The fund is expected to have low volatility with a very low correlation to the All Bond Index (ALBI). Investment decisions are driven by fundamental proprietary in-house research. The fund's target return is cash plus 3%. The objective is to achieve this return with low risk, providing attractive risk-adjusted returns through a low fund standard deviation.

The fund may make use of derivative instruments for efficient portfolio management purposes.

INVESTMENT PARAMETERS

The Coronation Granite Hedge Fund may not invest in international investments. The fund may use leverage but such leverage shall be limited to 5 (five) times. The fund is precluded from raising any debt funding over and above that achieved in terms of the long/short process. Value at risk is monitored on a daily basis and is subject to an internal limit of 6% at a 95% confidence level, and 10% at a 99% level. The maximum modified duration of the fund may not exceed that of the ALBI. The portfolio will have maximum credit exposure limits with reference to credit classification bands, determined in accordance with the fund's Credit Exposure Guidelines. Limits per issuer within each credit classification band exist and are monitored on a daily basis. No writing of uncovered options will be permitted. The fund employs stop-loss strategies to facilitate capital preservation. The intention is to invest the majority of the fund in liquid tradable securities that are listed on BESA or the JSE. The fund may invest in unlisted vehicles, in particular money market investment and exposure to small capitalisation shares may be achieved in this way. Investment in derivatives is permitted for efficient investment management of the fund.

MONTHLY COMMENTARY

The Fund returned 0.7% in December, taking the one-year return to 6.3%. This places it 1.5% ahead of cash over 12 months.

The South African economy grew at a much-stronger-than-expected 1.6% quarter on quarter (q/q) in the third quarter of 2022 (Q3-22) following a contraction of 0.7% q/q in the second quarter. On the supply side, growth came mostly from agriculture, transport, and financial and business services, while utilities (mostly electricity) detracted. On the expenditure side, net trade was the biggest contributor, despite challenges in the logistics sector, including strikes in Q3-22. Inventory accumulation, possibly owing to aggravated loadshedding, was also a major positive contributor to growth. Looking ahead, fourth quarter activity in 2022 will be dogged by high stage loadshedding, which may be partly offset by a decent tourist season. However, we expect activity to be weaker than that of Q3-22.

Headline inflation moderated to 7.4% year on year (y/y) in November from 7.6% y/y October, but core inflation remained unchanged at 5.0% y/y. Lower fuel and transport costs accounted for much of the moderation, while food and broader goods and services prices remain sticky. We expect CPI to average 6.9% in 2022. An early and substantial fuel price cut in January should see a faster slowing in headline inflation than we had expected and will lower the average headline CPI for 2023. Despite this, we expect the South African Reserve Bank to raise the repo rate by 50 basis points in January, to a peak rate of 7.5%.

While global monetary policy continues to push into restrictive territory and central banks remain hawkish, risk sentiment has improved, and we have seen a stabilisation in longer dated yields in the US. The messages from central banks continue to highlight that higher peak policy rates may be required to have the desired impact on inflation. This rhetoric, together with economic data releases, will undoubtedly keep markets volatile.

With the progressive evaporation of market liquidity over the mid-summer holiday period, the Fund tended to concentrate trading activity at the beginning of December to avoid liquidity-induced difficulties. So, while the overlay was engaged for a shortened period over the last month due to risk management considerations, this still proved a productive episode. The first half of December within local fixed income market was really dominated by a recovery from the sharp weakness experienced at the end of November – fortunately, the Fund's tactical positions were organised for such an outcome, and this materialised before the necessary squaring up of risk exposures prior to the year-end.

Looking ahead, the Fund is well placed from an enhanced credit carry perspective, which is also expected to provide additional scope to utilise the active overlay relatively assertively. Indeed, with higher base rates and the likely approach of the tail-end of monetary tightening in SA, this is an especially opportune phase of the interest rate cycle for a Fund such as Granite, which has been positioned to take advantage of higher absolute interest rates through both its floating rate allocation and its fixed rate asset selection.

REGULATORY DISCLOSURE AND DISCLAIMER

The content of this document and any information provided may be of a general nature and is not based on any analysis of the investment objectives, financial situation or particular needs of any potential investor. As a result, there may be limitations as to the appropriateness of any information given. It is therefore recommended that any potential investor first obtain the appropriate legal, tax, investment or other professional advice and formulate an appropriate investment strategy that would suit the risk profile of the potential investor prior to acting upon such information and to consider whether any recommendation is appropriate considering the potential investor's own objectives and particular needs. Neither Coronation Fund Managers Limited nor any subsidiary of Coronation Fund Managers Limited (collectively "Coronation") is acting, purporting to act and nor is it authorised to act in any way as an adviser. Any opinions, statements or information contained herein may change and are expressed in good faith. Coronation does not undertake to advise any person if such opinions, statements or information should change or become inaccurate. Coronation Management Company (RF) (Pty) Ltd is an approved manager of Collective Investments Schemes. Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future performance of the fund. Hedge Fund strategies can result in losses greater than the market value of the fund, however investor's losses are limited to capital invested or contractual commitments. Hedge Funds may invest into illiquid instruments which may result in longer periods for investors to redeem units in a portfolio. The ability of a portfolio to repurchase is dependent upon the liquidity of the portfolio and cash of the portfolio. All income, capital gains and other tax liabilities that may arise as a result of participating in this investment structure remain that of the investor. Coronation reserves the right to close the Fund to new investors in order to ensure the Fund is more efficiently managed in line with our clients' mandates. The investor acknowledges the inherent risk associated with an investment in the Fund and agrees that Coronation will not be liable for the consequences of the market influences and consequent changes in unit prices. Collective Investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager provides no guarantee either in respect of capital preservation or investment return. The Fund's net asset value and price per participatory interest is available at any time on request as well as published monthly in the Fund Fact Sheet, available on www.coronation.com. Investors and potential investors may contact the Manager for the latest version of the application form, annual report, and any additional information required on the Fund, free of charge. Coronation Fund Managers Limited is a full member of the Association for Savings and Investment SA (ASISA). Coronation Asset Management (Pty) Ltd (FSP 548), Coronation Investment Management International (Pty) Ltd (FSP 45646) and Coronation Alternative Investment Managers (Pty) Ltd (FSP 49893) are authorised financial services providers. Coronation Life Assurance Company Limited is a licenced insurer under the Insurance Act, No.18 of 2017.
