

## WHAT IS THE FUND'S OBJECTIVE?

The fund aims to deliver a higher return than bank deposits and traditional money market funds.

## WHAT DOES THE FUND INVEST IN?

The fund will typically only invest in South African money market instruments. These include a wide range of instruments issued by banks, corporations and other institutions. The fund will primarily invest in floating-rate instruments, and has a maximum duration of two years.

## IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

## Risk Profile

Maximum growth/  
minimum income exposures

The fund is designed to protect capital, while providing a steady stream of income over time. This is achieved by holding floating rate notes that provide a higher yield than the prevailing money market rate. Floating rate notes will also protect the investment against interest rate volatility or unexpected interest rate changes.

Our fixed income investment team researches the full spectrum of money market instruments.

The fund's investments are subjected to a strict risk management process. All factors that could affect these investments are carefully monitored, including inflation as well as currency and interest rates.

While the risk of losing money over all investment periods is low, the fact that the fund can take somewhat more risk than a traditional money market fund is reflected in its fluctuating rather than constant daily price.

## HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The recommended term for this investment is one month and longer. Given its lack of exposure to growth assets, the fund is not suited for lengthy investment terms.

## WHO SHOULD CONSIDER INVESTING IN THE FUND?

Risk averse investors who seek

- ▶ protection against possible interest rate volatility;
- ▶ an alternative to bank deposits or money market funds that may deliver better returns;
- ▶ fast access to their money, and who don't want to commit their cash for a specific period;
- ▶ capital protection, but not long-term capital growth.

## WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 0.45% (excl. VAT) is payable.

Fund expenses that are incurred in the fund include trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.

**Please note that the commentary is for the retail class of the Fund.**

### Performance

The Fund generated a return (net of management fees) of 1.72% for the fourth quarter of 2022 (Q4-22), and 5.61% over a rolling 12-month period. This is ahead of the three-month Short-Term Fixed Interest (SteFI) benchmark return of 4.82%.

The South African Reserve Bank (SARB) increased the repo rate by 75 basis points (bps) at the November monetary policy committee (MPC) meeting, moving the repo rate to 7%. The SARB has cumulatively increased rates by 350bps since the commencement of the rate hiking cycle. The tone at the last meeting was less hawkish, signalling that the MPC will become more sensitive to underlying growth and inflation developments. We expect overall inflation to have averaged 6.9% for 2022. We expect inflation to average at 5.2% in 2023 on the back of an early and substantial fuel price cut in January 2023, which should see a faster-than-expected slowing in headline inflation. Despite this, we expect the SARB to raise the repo rate by 50bps in January, to a peak rate of 7.5%.

### Fund positioning

During the last quarter, the 3-month Johannesburg Interbank Average Rate (Jibar) increased by 0.79% to 7.26% factoring in the increases in the repo rate. The market is less hawkish on the outlook for rates, with the forward rate curve flattening out in the 6-12 months tenors. This suggests expectations of the repo rate peaking in the first half of 2023. The 6- and 9-months Treasury Bills (T-Bill) remain attractive relative to NCDs and warrant a position in the Fund. We will be looking to increase our T-Bill and 1-year NCD positions when the opportunity arises.

#### T-BILLS VS FIXED RATE NCDS VS FRA

Source: Bloomberg, SARB

We saw several corporates and banks issue senior unsecured bonds in the primary credit markets, albeit for refinancing purposes. Corporate issuers continued to receive support with oversubscribed auction bids and auctions clearing at mid-level or below the lower end of price guidance. The banks returned to the debt capital market with capital instruments that are more suited to funds with medium- to high-risk budgets. We have been successful in getting credit in the secondary market for the Fund.

### Outlook

We continue to remain cautious and invest only in instruments that are attractively priced relative to their underlying risk profiles. Capital preservation and liquidity remain the key focus for this Fund.

#### IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION JIBAR PLUS FUND

Unit trusts should be considered medium- to long-term investments. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The yield shown is an estimate (gross of fees) in part based on market assumptions and forecasts. The yield is calculated by taking the interest and income receivable of all the instruments in the fund divided by the net asset value, expressed as a nominal annual rate. It is provided to give an approximate indication of the achievable yield for an investment made at the reporting date. Actual experience may differ, based on changes in market values, interest rates and changes in costs actually experienced during the investment period. The asset allocation by issuer type and top 5 issuer exposures are not reflected on a look-through basis. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Portfolio managed by Coronation Asset Management (Pty) (FSP 548) Ltd, an authorised financial services provider. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Standard Chartered has been appointed as trustees for the fund ([www.sc.com/za](http://www.sc.com/za); 011-2176600). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

#### HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

#### HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

#### WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

#### ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

#### WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on our website, [www.coronation.com](http://www.coronation.com)
