

WHAT IS THE FUND'S OBJECTIVE?

Global Opportunities Equity seeks to give investors access to some of the best fund managers across the globe. Our intent is to outperform its benchmark over any five year period.

WHAT DOES THE FUND INVEST IN?

Global Opportunities Equity is a multi-manager fund which invests in a limited number of strategies (funds and segregated mandates) managed by top-quality managers that mainly have exposure to shares in developed markets. It is also mandated to include some exposure to emerging markets.

Typically, six to ten strategies are included. Each strategy is selected based on its long-term track record of outperforming the market, its investment philosophy and the quality of its fund managers.

The fund is mandated to use derivative instruments for efficient portfolio management purposes.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Opportunities Equity invests in equity funds that mostly cover developed markets, including the US, Europe and Japan.

The fund is well-diversified; it has exposure to a range of different countries, industries and fund manager styles. The fund managers included in the fund are well-established and have been rigorously researched and vetted.

While we have a disciplined approach to carefully balance the risks across the different funds, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- want exposure to some of the world's top equity funds as part of a diversified investment portfolio;
- accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- are overexposed to South Africa and require an international investment;
- do not require an income from their investment

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 0.85% is payable.

All fees exclude VAT. Fund expenses incurred in the fund include fees payable to unconnected international fund managers on a portion of assets situated offshore as well as trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund.

Please note that the commentary is for the retail class of the Fund.

The Fund declined 19.3% for the quarter (Q2-22) against a benchmark return of -15.7%, bringing the rolling 12-month performance to -28.7% against the -15.8% returned by the MSCI All Country World Index (ACWI).

Q2-22 was another difficult quarter for global equity markets and this is now the worst first half of a year for developed market equities in more than 50 years. This was largely due to the shift to a far more hawkish stance by the US Federal Reserve and other central banks to combat persistent inflation which is at multi-year highs in many countries. The economic outlook of increased rates and its potential to cause a recession put pressure on growth expectations and equity valuations, causing sharp declines in equity markets. Long duration growth stocks bore the brunt of this, with the Nasdaq 100 falling 22.5% over the quarter.

The Pacific ex-Japan was the best performing region in Q2-22, despite declining 14.1% (in US dollar terms). The weakest return was from North America, which declined 16.7% (in US dollar terms). Europe fell 14.2% and Japan fell 14.6% (both in US dollar terms). Developed markets performed worse than emerging markets, declining 16.2% compared to -11.4% (both in US dollar terms).

Amongst the global sectors, energy (-5.9%), consumer staples (-7.0%) and healthcare (-7.5%) were the best performing sectors for the quarter. The worst performing sectors were consumer discretionary (-24.1%), IT (-21.9%) and materials (-20.2%). On a look-through basis, the Fund's largest exposures are to consumer discretionary, IT and communication services. The Fund has very little exposure to consumer staples, utilities and real estate.

The underlying funds generally struggled over the quarter and most underperformed the index. Only the Coronation Global Emerging Markets Fund performed better than the ACWI, albeit underperforming the MSCI Emerging Markets Index. Recent performance has been disappointing, but the managers of the various funds have mostly retained conviction in their positions, believing many to be oversold in the market panic over the direction of interest rates. On a three- to five-year view, there are a number of stocks that offer very attractive valuations even if interest rates do increase from here.

Tremblant Global Growth was the worst performing fund, losing 28.3% over the quarter. This was driven largely by its consumer discretionary and IT stocks, which together were -21%. Uber Technologies (-42.7%), Smartsheet (-42.6%), Shift 4 Payments (-46.6%) and DoorDash (-45.2%) were the worst amongst the IT stocks, while Amazon (-34.8%), Spotify (-37.9%) and Walt Disney (-31.2%) from consumer discretionary.

Contrarius Global Equity Fund declined -23.0%. It was more affected by the energy and materials sectors where some of its largest holdings reside, with some additional impact from communications stocks. Cleveland Cliffs (-52.3%), EW Scripps (-40.0%), Transocean (-27.1%) and Paramount Global (-34.1%) were amongst the worst performers.

Egerton Capital and SEG Crosby Street fell 18.2% and 16.7% respectively and were similarly impacted by IT, communications and consumer discretionary stocks.

The Fund is in the process of redeeming from Lansdowne Developed Markets, which is being replaced by Eminence Capital's Classic Long Strategy. The first investment with Eminence was initiated mid-quarter, and it had a negative impact on performance. Eminence's biggest drivers of negative performance were IT and consumer discretionary sectors (albeit to a much lower degree than other funds discussed above) but also from the healthcare and industrial sectors. Stocks from the last two sectors include Exact Sciences (-43.7%), Cresco Labs (-58.1%), Verano (-42.3%) and Vertiv Holdings (-41.3%).

The outlook is clouded with uncertainty and investors are seeking clarity as inflation, increasing interest rates and moderating economies converge. The war in Ukraine rages on, creating uncertainty in the energy markets, particularly in Europe. Inflation is expected to moderate over coming months, but energy market disruptions could derail this somewhat. Central banks are now committed to reining in inflation, maybe even to the detriment of their economies, which are generally slowing, and some could potentially tip into recession. Equity markets have fallen substantially and are now pricing in a lot of bad news but slowing demand and rising rates could still put further pressure on earnings, which could lead to further declines. However, moderating inflation, leading to a more gradual tightening in rates over the remainder of the year, would be more positive for markets.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL OPPORTUNITIES EQUITY FUND OF FUNDS

The Global Opportunities Equity Fund of Funds should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top holdings are not reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A fund of funds invests in collective investment schemes that levy their own fees and charges, which could result in a higher fee structure for this fund. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation International Limited, a firm authorised and regulated by the Financial Conduct Authority.

JP Morgan (Ireland) has been appointed as the fund's trustees (www.jpmorgan.com; t: +353-1-612-4000), and its custodian is JP Morgan Administration Services (Ireland) Limited (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) one day prior to the dealing date. You can expect to receive withdrawal payouts three business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.
