

WHAT IS THE FUND'S OBJECTIVE?

Global Equity Select aims to give investors access to the best opportunities in global equity markets. The fund is biased to developed markets and actively seeks out attractively valued shares to maximise long-term growth. Our intent is to outperform the global equity benchmark over all periods of five years and longer.

WHAT DOES THE FUND INVEST IN?

The fund invests in the shares of companies listed on equity markets around the world. The fund has a bias towards developed markets, typically holding at least 70% in developed market shares and up to 30% invested in shares listed in emerging markets. While our intent is to remain fully invested in shares, the fund is allowed to hold up to 20% of its portfolio in cash and bonds.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Equity Select will only invest in shares we view as being attractively valued relative to other shares which may offer superior long-term investment growth.

The fund's share selection is the result of rigorous international research conducted by Coronation's investment team.

While we have a disciplined approach to reducing risk, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- ▶ are comfortable with full exposure to shares listed in global markets outside South Africa;
- ▶ accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- ▶ hold other investments and are looking to add exposure to global equity markets;
- ▶ do not require an income from their investment.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.25% is payable.

Fund expenses that are incurred in the fund include administrative, trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs. We do not charge any fees to access or withdraw from the fund.

Please note that the commentary is for the retail class of the Fund.

In the first quarter of 2024, equities continued their upward march, advancing 8%, which compares to the Fund's return of 6.0%.

In general, we think the opportunity to add value from differentiated stock picking remains elevated. The market's appreciation and inflated trading multiple (relative to history) obscures opportunities at the single stock level, which our analysts believe to be compelling.

One such example is Interactive Brokers (IB), the online broker, which turned from a detractor in the previous quarter to a significant contributor. Compared to the multi-trillion-dollar market capitalisations of the mega-cap stocks, which have been driving overall index returns, IB is a relative minnow, with a \$48bn market cap, and an even smaller free float of only \$12bn. The company released strong annual results in January, showing good growth in client accounts (23% growth) and the benefit of higher interest rates boosting net earnings by 42%. Its monthly releases showed that this strong growth has continued post year-end, with accounts up another 25% on the previous year and client balances and trading activity up significantly. The market has (correctly, in our view) shifted focus from the headwind of lower future interest rates to the strong growth in underlying earnings power this implies. IB's moat is its highly automated, low-cost platform, which allows it to offer the lowest prices while earning a pre-tax margin of over 70%. IB's offering to clients cannot be matched by any of its peers and we believe this will allow the business to keep growing its underlying earnings power in double digits for a number of years. This is not fully reflected in the current market price, in our view.

TransUnion is a high-quality business, though not a household name, contributing positively to returns in the first quarter. TransUnion is one of the three major US credit bureaus, with a broader information services business anchored in its core competency of identity resolution. The stock suffered a precipitous decline in the latter half of 2023, as a spike in bond yields led to a rapid deceleration in credit activity. We believed the setback to be cyclical rather than indicative of any fundamental impairment of the quality of the business. In our view, the market had overlooked the very strong performance from rapidly growing markets like India, where TransUnion holds a leading position; the opportunity for growth in non-credit related verticals, such as insurance underwriting, marketing and fraud protection; and the ability to expand margins, thanks to a newly announced efficiency programme and ongoing synergy realisation from recent acquisitions. We used the opportunity to buy shares at a discount late in Q4. As the stock has recovered by more than 80% from its October lows, and now more closely reflects our assessment of fair value, we have subsequently exited the position.

Sticking to the smaller businesses, \$5bn market cap Smartsheet detracted from returns in the quarter, despite surpassing both our internal forecasts and market expectations in its latest earnings release. Smartsheet provides work collaboration software that facilitates more efficient project planning, management, and tracking. The software's supremacy is evidenced by Smartsheet's industry-leading retention rates and presence in over 80% of Fortune 500 companies, with these enterprise clients appreciating the scalability of its tech stack. The core product is sticky, and Smartsheet continues to benefit from its land and expand strategy. Since its listing in 2018, Smartsheet has consistently achieved annual revenue growth exceeding 20%, accompanied by robust gross profit margins surpassing 75% and notable progress towards high cash flow generation. However, its recent revenue guidance disappointed the

market. While there has been an industry-wide slowdown in mid-market customer IT spend, we believe this is cyclical and will recover. With the retirement of its long-standing Chief Revenue Officer, Mike Arntz, announced in March, we think guidance is deliberately conservative to allow for a smooth transition of the new Head of Sales, Max Long (ex-Adobe and ex-Microsoft). In summary, expectations now seem low and much pessimism is reflected in Smartsheet's price. It trades at a 40% discount to mid-cap software peers and a meaningful discount to our estimate of fair value. We have therefore used the post-earnings sell-off to add to our holding.

As stated in last quarter's commentary, we would not be surprised if 2024 is another eventful year. As always, we can't predict the direction of markets in the near term, and so we aim to focus on what we can control, which is finding and researching good investment ideas. On that note, our team continues to find attractive opportunities below the index surface level in areas of the market that remain discounted. We believe it is a productive environment for investors with a long-term time horizon, and we remain excited about the portfolio that we are invested in. Thank you for your support and interest in the Fund.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL EQUITY SELECT FUND

The Global Equity Select Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top 10 holdings are reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Services Board of South Africa. Portfolio managed by Coronation Investment Management International (Pty) Ltd (FSP45646), an authorised financial services provider.

JP Morgan Bank (Ireland) has been appointed as the fund's trustees (www.jpmorgan.com; t: +353-1-612-4000), and its custodian is JP Morgan Administration Services (Ireland) Limited (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) to ensure the value of the same business day. You can expect to receive withdrawal payouts three to four business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.
