

WHAT IS THE FUND'S OBJECTIVE?

Global Opportunities Equity seeks to give investors access to renowned fund managers across the globe. Our intent is to outperform its benchmark over any five year period.

WHAT DOES THE FUND INVEST IN?

Global Opportunities Equity is a multi-manager fund which invests in a limited number of strategies (funds and segregated mandates) managed by top-quality managers that mainly have exposure to shares in developed markets. It is also mandated to include some exposure to emerging markets.

Typically, six to ten strategies are included. Each strategy is selected based on its long-term track record of outperforming the market, its investment philosophy and the quality of its fund managers.

The fund is mandated to use derivative instruments for efficient portfolio management purposes.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Opportunities Equity invests in equity funds that mostly cover developed markets, including the US, Europe and Japan.

The fund is well-diversified; it has exposure to a range of different countries, industries and fund manager styles. The fund managers included in the fund are well-established and have been rigorously researched and vetted.

While we have a disciplined approach to carefully balance the risks across the different funds, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- want exposure to some of the world's top equity funds as part of a diversified investment portfolio;
- accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- are overexposed to South Africa and require an international investment;
- do not require an income from their investment.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 0.85% is payable.

All fees exclude VAT. Fund expenses incurred in the fund include fees payable to unconnected international fund managers on a portion of assets situated offshore as well as trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund.

More detail is available on www.coronation.com.

Performance and fund positioning

The Fund declined 1.2% for the quarter (Q1-25) compared to the benchmark return of -1.3%, bringing the rolling 12-month performance to 6.6% compared with the 7.2% returned by the MSCI All Country World Index (ACWI).

The first weeks of President Trump's second term introduced uncertainty over US trade policy and the on/off implementation of trade tariffs on its closest trading partners – Mexico and Canada – unnerved the markets, especially in the US where fears of slower growth and higher inflation took hold, causing the S&P 500 Index to decline 4.3% over the quarter. Although China didn't escape the first round of tariffs, the amount was less punitive than expected and, together with a more supportive attitude from the government, allowed for a strong rally in Chinese equities. The US' commitment to NATO was also under the spotlight, and the new administration's admonishment of its European allies' low defence spending was a wake-up call for many. The European response was immediate and significant, and future spending commitments caused a strong rally in European defence stocks and in European markets generally.

Europe was the best performing region in Q1, advancing 10.6% (in US dollar terms). The weakest return was from North America, which declined 4.3% (in US dollar terms). The Pacific ex-Japan gained 0.4% and Japan advanced 0.5% (both in US dollar terms). Emerging markets outperformed developed markets, gaining 2.9% compared to -1.8% (both in US dollar terms).

Amongst the global sectors, energy (9.2%), utilities (6.6%) and consumer staples (+5.5%) were the best performing sectors for the quarter. The worst performing sectors were IT (-12.0%), telecommunications (-4.6%) and consumer discretionary (-10.5%).

It was a mixed quarter for the managers with Egerton and the two Coronation funds delivering solid positive performance, but the rest of the managers all lagged the markets with negative returns.

Egerton returned an excellent 5.7% for the quarter, with exposure to industrials and financial stocks driving the positive return. Rolls-Royce (+31.7%) was the largest contributor out of the industrial stocks, but General Electric (+20.2%), Safran (+14.1%) and Airbus (+5.2%) all weighed in with good gains. Amongst the financials, Progressive Corp (+20.4%) and Munich Re (+19.5%) made similar large contributions, but HSBC (+14.7%), Banco Bilbao (+32.7%) and AIB Group (+18.5%) were not far behind.

Coronation Global Emerging Markets Fund returned 3.3%, ahead of its direct GEM benchmark but, more importantly, far ahead of the ACWI return of -1.3%. The Fund benefited from communications and consumer discretionary exposure. Chinese internet and technology stocks had a very strong quarter with the likes of SEA Ltd (+23.0%), JD.com (+18.6%), Tencent Music (+27.0%), Pinduoduo (+22.0%) all adding to performance. Naspers (+11.1%) and Prosus (+15.8%) both benefited from this surge as well. MercadoLibre, the Brazilian online retailer (+14.7%) and BYD, the

Chinese electric car manufacturer (+47.1%) also made excellent contributions.

Similarly, Coronation Global Equity Select had another positive quarter with a diverse set of contributors to overall performance. Auto1 Group (+30.1%), Just Eat (+46.9%), Spotify (+23.0%), Rolls-Royce (+31.7%), and SEA Ltd (+23.0%) were the top contributors.

Despite holding a number of the best performing stocks over the quarter, Eminence Capital was marginally behind the index with -2.4%. Good returns from Alibaba (+56.0%), SEA Ltd (+23.0%), Okta (+33.5%) and St. James' Place (+28.4%) were overridden by Dave & Buster's Entertainment (-39.8%), Green Thumb Industries (-28.9%), Verano Holdings (-47.8%) and Salesforce (-19.7%).

Contrarius Global Equity's volatile returns continued with a sharp decline of -7.1% for the period. The negative return was broad-based across the portfolio, with the biggest detractors being Tesla (-35.8%), Block (-36.1%), Coinbase (-30.6%), Intellia Therapeutics (-39.0%), and QVC Group (-39.0%). The losses were slightly offset by good gains from Alibaba (+56.0%), Tencent (+19.2%) and JD.com (+18.6%).

Tremblant also endured a poor quarter, declining 5.5% with its consumer discretionary exposure doing most of the damage. Victoria's Secret (-55.1%), Skechers (-15.6%), Amazon (-13.3%) and Walt Disney (-11.4%) were some of the biggest detractors in this sector. Application software companies also detracted with examples being Five9 (-33.2%), AvidXchange Holdings (-18.0%) and Q2 Holdings (-20.5%).

Finally, Lone Monterey returned -4.3% with some of the bigger positions having a weak quarter. Examples include KKR (-21.7%), Amazon (-13.3%), Salesforce (-19.7%) and Microsoft (-10.8%). On the positive side, they also held Rolls-Royce, Spotify and Auto1 Group.

Outlook

Although Q1 provided a volatile start to the year, it was nothing compared to the first few days of Q2. President Trump's "Liberation Day" on 2 April saw the introduction of significant "reciprocal" tariffs on all the US' trading partners, with only Russia being spared the additional measures. Mixed messaging from the administration on whether these are simply a negotiating tactic or longer-term measures to force manufacturing back to the US further compounded the bad news, and global markets sold off heavily in the ensuing days. Responses have been mixed, with many countries looking to negotiate deals to remove the new tariffs, but China stood firm and announced equal tariffs on US imports and other measures. Although markets are rebounding at the time of writing, it is not clear where this ends, but it is sure to be a tumultuous Q2.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL OPPORTUNITIES EQUITY FUND OF FUNDS

The Global Opportunities Equity Fund of Funds should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top holdings are not reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A fund of funds invests in collective investment schemes that levy their own fees and charges, which could result in a higher fee structure for this fund. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation International Limited, a firm authorised and regulated by the Financial Conduct Authority.

JP Morgan (Ireland) has been appointed as the fund's trustees (www.jpmorgan.com; t: +353-1-612-4000), and its custodian is JP Morgan Administration Services (Ireland) Limited (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) to ensure the value of the same business day. You can expect to receive withdrawal payouts three to four business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.
