# **GLOBAL ABSOLUTE STRATEGY**

INSTITUTIONAL STRATEGY FACT SHEET AS AT 31 OCTOBER 2021

## LONG TERM OBJECTIVE

The Coronation Global Absolute Strategy targets positive real returns with an overriding focus on limiting downside returns or portfolio losses. Therefore, capital preservation in real terms is equally important to return optimisation. The Strategy is managed in accordance with the limits of Regulation 28 of the Pension Funds Act.

## **INVESTMENT APPROACH**

Coronation is a long-term, valuation-driven investment house. Our aim is to identify mispriced assets trading at discounts to their long-term business value (fair value) through extensive proprietary research. In calculating fair values, through our fundamental research, we focus on through-the-cycle normalised earnings and/or free cash flows using a long-term time horizon. The Portfolio is constructed on a cleanslate basis based on the relative risk-adjusted upside to fair value of each underlying security. The Portfolio is constructed with no reference to a benchmark. We do not equate risk with tracking error, or divergence from a benchmark, but rather with a permanent loss of capital.

## **BEAR MARKETS**

# **BULL MARKETS**

In the bar graphs above, we have divided the period since inception of our Strategy into bull and bear markets. The Strategy's returns are measured against the FTSE/JSE All Share index. The bear market graph clearly demonstrates how the Strategy has protected capital; its losses were much more shallow than the market during downswings. As evident from the second graph, the Strategy also enjoyed healthy upside participation in bull markets.
