

WHAT IS THE FUND'S OBJECTIVE?

The fund aims to maximise long-term growth from investing in a select group of small to medium-sized JSE-listed companies.

It seeks to outperform the combined JSE Mid and Small Cap Indices.

WHAT DOES THE FUND INVEST IN?

The fund invests in companies that form part of the JSE Small or Mid Cap Indices, or in companies that have a market capitalisation smaller than the company with the lowest market capitalisation in the JSE Large Cap Index.*

The fund is mandated to use derivative instruments for efficient portfolio management purposes.

*The investment universe has been amended to align with the ASISA category specifications for Mid and Small Cap Funds

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Risk Profile

Maximum growth/
minimum income exposures

■ Growth Assets: 100%
■ Income Assets: 0%

The fund actively seeks out attractively valued companies that could offer strong long-term growth.

Shares are selected following rigorous research into the long-term potential of a company, and whether it is currently attractively valued relative to its sector.

Shares can be volatile investments, and smaller companies in particular may experience price swings. Smaller companies have fewer shares trading freely in the market, which can restrict trading and amplify price movements. Consequently, there is a heightened risk of capital loss over the short term.

However, given its focus on investing only in attractively valued shares that could offer long-term growth, the fund may preserve capital better than its benchmark over the long run.

The fund is concentrated and only invests in one sector of the market, making it riskier than a general equity fund.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of five years or more is therefore ideal.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- wish to benefit from the potential growth in medium-size and small companies;
- want to diversify their investments to include specific exposure to companies outside of the JSE Large Cap Index;
- accept the inherent volatility in investing in less liquid shares;
- want to hold the Smaller Companies Fund as one of multiple funds in their investment portfolio.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.00% (excl. VAT) is payable.

Fund expenses that are incurred in the fund include trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.

We do not charge fees to access or withdraw from the fund.

Please note that the commentary is for the retail class of the Fund.

Performance and fund positioning

A commentary on the first quarter of 2025 (Q1) feels completely overshadowed by the market rout we are experiencing following US President Trump's tariff announcement. The share price moves we have seen in the days since have been significant. Add to the mix the current uncertainty around the Government of National Unity (GNU), and it's a perfect storm of negativity. Moments like these are never comfortable, but history tells us that they provide good opportunities to build on the Fund's strategy, which is to own a portfolio of high-quality companies trading below their true value.

Q1 was a tough quarter for the Fund, which delivered a negative 5.9% return. The three-year compound annual growth rate performance of 11.8% remains reasonable, keeping it the top-performing fund in its category.

During the quarter, the Association for Savings and Investment South Africa (ASISA) changed the mandate for mid and small cap funds. These funds are now allowed to invest up to 20% of their respective portfolios in large caps. This is somewhat of a conundrum for us, as many investors in the Fund would have chosen this Fund for its concentrated exposure to smaller companies. We, however, viewed this mandate change as an opportunity to add a few high-quality shares to the portfolio. It has also enabled the Fund to be better diversified as the shares we have bought are generally global businesses. The Fund will remain at least 80% invested in smaller companies, but we believe that the mandate change improves the quality and long-term prospects of the portfolio.

The first change made was to buy Prosus, Bidcorp and Mondi. All these companies have very different drivers to the existing holdings and are, for the most part, not exposed to South Africa. They are some of the most favoured investments held by our popular multi-asset portfolios, such as Coronation Balanced Plus. One of the core strategies of the Coronation Smaller Companies Fund is to hold the best businesses in their respective industries. The mandate change, therefore, allowed us the choice between holding Spar or Shoprite. As we know, Shoprite is significantly higher rated than Spar, but has much better fundamentals. Our learnings over the past two decades have taught us that, over the long term, it is better to invest in high-quality companies at a fair price than low-quality at a seemingly low price. As such, we began switching out of Spar into Shoprite.

In order to raise cash for the buying mentioned above, we needed to do a fair amount of selling. The three largest sells in the quarter were Reinet, Cashbuild and African Rainbow Minerals (ARM).

We had held Reinet predominantly for its rand hedge qualities in a portfolio where this is hard to come by. However, the fact that we could now choose from a broader basket of rand hedges meant that Reinet was sold.

Cashbuild had been an opportunistic purchase in 2024, in the hope that the SA economy would fare better on the back of the formation of the GNU. This has seemingly not transpired, and Cashbuild's recent results indicate that business conditions remain tough for SA-facing companies.

Under our old mandate, the investable universe for resource companies was fairly limited. We could not hold any of the big three diversified miners, BHP Billiton, Anglo American or Glencore. Now that we can hold these counters, which own better quality assets than ARM, we decided to sell out of ARM.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION SMALLER COMPANIES FUND

The Smaller Companies Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. Asset allocation and top 10 holdings are reflected on a look-through basis. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Portfolio managed by Coronation Asset Management (Pty) Ltd (FSP 548), an authorised financial services provider. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Standard Chartered has been appointed as trustees for the fund (www.sc.com/za; 011-2176600). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class R NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

BENCHMARK DETAILS

The benchmark is a free-float market cap weighted index of small and mid-cap indices excluding real estate.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on our website, www.coronation.com.
