

CORONATION GLOBAL EQUITY SELECT FUND

Fund Information as at 30 November 2025

WHAT IS THE FUND'S OBJECTIVE?

Global Equity Select aims to give investors access to the best opportunities in global equity markets. The fund is biased to developed markets and actively seeks out attractively valued shares to maximise long-term growth. Our intent is to outperform the global equity benchmark over all periods of five years and longer.

WHAT DOES THE FUND INVEST IN?

The fund invests in the shares of companies listed on equity markets around the world. The fund has a bias towards developed markets, typically holding at least 70% in developed market shares and up to 30% invested in shares listed in emerging markets. While our intent is to remain fully invested in shares, the fund is allowed to hold up to 20% of its portfolio in cash and bonds.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Equity Select will only invest in shares we view as being attractively valued relative to other shares which may offer superior long-term investment growth.

The fund's share selection is the result of rigorous international research conducted by Coronation's investment team.

While we have a disciplined approach to reducing risk, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- are comfortable with full exposure to shares listed in global markets outside South Africa;
- accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- hold other investments and are looking to add exposure to global equity markets;
- do not require an income from their investment.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.15% is payable. This fee is applicable from 1 October 2025 and was reduced from 1.25% with effect from that date.

Fund expenses that are incurred in the fund include administrative, trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs. We do not charge any fees to access or withdraw from the fund.

More detail is available on www.coronation.com.

Please note that the commentary is for the retail class of the Fund.

The stock market recovery post April's tariff tantrum continued in Q3, with the MSCI All Country World Index advancing 8%. Perhaps most notable was the broad-based market strength in the face of much macro consternation, combined with a geographic broadening of returns: Developed Markets ex-US and Emerging Markets are both more than 10% ahead of the S&P 500 Index year-to-date (YTD). The return generated in the quarter brings the Fund's return for the last twelve months to 40.5%, compared to 17.3% for the benchmark.

With global stock market returns being driven by a small number of US-listed, large capitalisation technology shares over the last few years, it was very pleasing to see this continued broadening out of market returns. Since early 2024, we have argued that increasingly narrow global stock markets have resulted in large parts of the market being totally ignored by investors. This has created a diversified opportunity set – across sector, style, and geography – for us as long-term focused, active stock pickers. While we admire many US businesses and are still finding select value there, we find the current opportunity set outside of the US more attractive, as shown in the graph on the right.

Figure 1

CONTINUING TO FIND OPPORTUNITIES OUTSIDE OF THE US

Last quarter we discussed the emerging market (EM) quartet of winning businesses MercadoLibre, Coupang, Nubank and Sea Ltd. These companies have a history of strong innovation, having leveraged their leading platforms into new services and revenue streams, with strong growth outlooks underpinned by multiple structural tailwinds. And this quarter, seven of the top 15 contributors were from EM, with the list including CATL, the Chinese battery maker which holds a commanding global position in the provision of batteries for electric vehicles and energy storage systems; Nubank, the abovementioned leading digital bank in Latin America; Grab Holdings, which holds a dominant position in South East Asian ride-hailing alongside a strong presence in food delivery and fintech; and Eternal, the fast-growing Indian leader in online food delivery and quick commerce. Each of these businesses is on the right side of technological change, with a strong multi-year growth outlook that is superior to US-based peers, whilst trading at a fraction of the relative valuation.

With global stock markets also increasingly volatile, we continue to believe that frequent and extreme price dislocations are creating significant opportunities for investors who focus their research on company fundamentals. These opportunities still emerge even within the arguably "expensive" US market. One such example is Warner Bros. Discovery, a company we have owned for nearly three years, and also the largest contributor in the quarter. Warner Bros. Discovery is a US-listed media company consisting of three distinct businesses. Its growth assets include the critically acclaimed HBO Max streaming platform, which is behind hit shows like Game of Thrones and The White Lotus, and the Warner Bros. Studio, which owns valuable IP such as Superman and Harry Potter. It also owns a collection of linear TV networks that are in structural decline but still contribute significantly to earnings and cash generation. As a result of a still hefty, but declining and manageable debt load as well as exposure to declining linear networks, the market largely ignored the combined entity, which traded on a single-digit PE multiple. But this has now changed. First, the company announced that it would split into two

separate entities to better highlight the value in its growth assets. And then in early September, it emerged that the Ellison-backed Paramount Skydance Corporation was exploring a bid for the whole company, sending shares up 50% plus over two days.

Mercado Libre, the leading ecommerce and fintech player in Latin America, was a detractor in the quarter (whilst still being a positive contributor YTD). The share declined 10% over the period due to concerns over Argentina's economy (its third-largest market by sales, but more in terms of profits) and increased competitive intensity in Brazil. Whilst cognisant of these risks, it is worth remembering that Mercado Libre has grown strongly through many economic cycles, as evidenced by exceptional revenue growth of 45% per annum in USD over the last decade. And in Brazil specifically, it has an extremely strong competitive position thanks to its synergistic ecosystem that includes ecommerce, payments, and credit, and continues to grow its market share in the Brazilian ecommerce market. We continue to be attracted to its long growth runway, with ecommerce and credit penetration remaining very low in its geographies. We took advantage of the recent weakness to add to our position.

It was also pleasing to see strong contributions from Thermo Fisher Scientific and UnitedHealth. We had written about our healthcare holdings in Q2:

"Our healthcare holdings, which span the life sciences, health insurance, and healthcare equipment sectors, underperformed this quarter, largely due to growing uncertainty around potential regulatory changes in the US. The Trump administration has proposed cuts to healthcare programmes, including reductions to government and academic funding, the FDA and Medicaid. They have also implemented tariffs that affect the cost of drugs and medical equipment manufactured abroad. More recently, President Trump signed an executive order aimed at reducing US drug prices, which are currently about three times higher than in other developed markets. Most pharmaceutical companies earn the bulk of their profits in the US, and therefore, this change is raising concerns about how future innovation will be funded. These regulatory developments are adding a cloud of uncertainty over R&D spending and capital investment across the healthcare sector."

We believe market reactions have overshot the likely impact of these potential changes. We remain confident in our selected healthcare holdings and believe they are well-positioned across global supply chains, customer bases, and/or product portfolios to not only navigate these changes but also gain market share in the process."

Approximately 13 country benchmarks hit all-time highs in Q3. And while the upside in our equity portfolio is lower than at the depths of the market sell-off in April, we still see an attractively valued portfolio that is diversified across geographies and sectors, and importantly, the composition of the equity portfolio remains high quality, with over 90% of the equity bucket comprised of winning businesses.

Thank you for your support and interest in the Fund.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL EQUITY SELECT FUND

The Global Equity Select Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top 10 holdings are reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation Investment Management International (Pty) Ltd (FSP45646), an authorised financial services provider.

JP Morgan SE (Dublin Branch) has been appointed as the fund's trustees and its custodian (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) to ensure the value of the same business day. You can expect to receive withdrawal payouts three to four business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.
