WHAT IS THE PRODUCT

Type:

Coronation Global Emerging Markets Fund - Class B (ISIN Code - IE00B553TV27) is an accumulating share class denominated in USD. The Fund is a sub-fund of Coronation Global Opportunities Fund, an open ended umbrella unit trust, authorised in Ireland as a UCITS. This document includes details in respect of this fund/share class. The Prospectus and Annual and Interim Financial Statements are prepared for the umbrella unit trust. The assets and liabilities of the Fund are segregated from the assets and liabilities of the other sub-funds of the Umbrella Unit Trust as an operation of law. Units of the Fund may be switched to units of other sub-funds of the unit trust, if approved by the Manger, upon submission of the appropriate investor dealing documentation (which can be obtained from the Administrator of the Fund, namely J.P. Morgan Administration Services (Ireland) Limited).

Term:

The fund is managed to deliver the best possible returns over the long term; an investment horizon of ten years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

Objectives:

The Coronation Global Emerging Markets Fund gives investors access to the best investment opportunities in global emerging markets and is constructed without reference to a particular benchmark. Its objective is to outperform the MSCI GEM Total Return USD (net of withholding taxes) Index NDUUEEGF Index over five years and more. The Fund is actively managed, and aims to deliver capital growth by investing in stocks from companies based in emerging markets, or which derive a significant portion of their business from emerging economies.

Intended Retail Investor:

Class B units are suitable for retail investors seeking a long term capital growth and who are willing to accept a high level of volatility.

WHAT ARE THE RISKS AND WHAT CAN I GET IN RETURN?

The risk indicator assumes you keep the product for the Recommended Holding Period set out in the 'What is the product?' section above. The actual risk can vary significantly if you sell your product at an early stage and you may get back less than you invested.

Summary Risk Indicator (SRI)

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 5 out of 7, which is a medium-high risk class and accordingly it is a medium-high risk product.
- Poor market conditions could impact our capacity to pay you. You are not entitled to receive back a minimum percentage of your capital and there is no capital guarantee scheme in place.
- The amount you will receive will be related to the value of the funds at the time you submit your redemption request which depends on future market performance and is uncertain. This product does not include any protection from future market performance so you could lose some or all your investment. If we are not able to pay you what is owed, you could lose your entire investment.
- You should read and consider the 'Risk Factors' sections of the product's prospectus and supplement before investing.
- The fund return is expressed in USD, but if expressed in Euro, may change depending on currency fluctuations.

This table shows the money you could get back over the next 10 years under different scenarios, assuming that you invest 10,000 USD.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The performance scenarios range from the stress scenario which shows what you might get back in extreme market circumstances to the favourable scenario which shows what you might get back in ideal conditions. The scenarios do not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WARNING: The performance scenario calculations are based on the assumptions set out in the Commission Delegated Regulations (EU 2021/2268 and EU 2017/653) and the future returns may vary significantly from those set out above.

WHAT HAPPENS IF CORONATION GLOBAL FUND MANAGERS (IRELAND) LIMITED IS UNABLE TO PAY OUT?

There is no Irish investor guarantee scheme which would cover losses incurred by this product.

WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest 10,000 USD. The figures are estimates and may change in the future.
