

## WHAT IS THE FUND'S OBJECTIVE?

The fund aims to deliver a higher return than bank deposits and traditional money market funds.

## WHAT DOES THE FUND INVEST IN?

The fund will typically only invest in South African money market instruments. These include a wide range of instruments issued by banks, corporations and other institutions. The fund will primarily invest in floating-rate instruments, and has a maximum duration of two years.

## IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

### Risk Profile

### Maximum growth/ minimum income exposures

The fund is designed to protect capital, while providing a steady stream of income over time. This is achieved by holding floating rate notes that provide a higher yield than the prevailing money market rate. Floating rate notes will also protect the investment against interest rate volatility or unexpected interest rate changes.

Our fixed income investment team researches the full spectrum of money market instruments.

The fund's investments are subjected to a strict risk management process. All factors that could affect these investments are carefully monitored, including inflation as well as currency and interest rates.

While the risk of losing money over all investment periods is low, the fact that the fund can take somewhat more risk than a traditional money market fund is reflected in its fluctuating rather than constant daily price.

## HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The recommended term for this investment is one month and longer. Given its lack of exposure to growth assets, the fund is not suited for lengthy investment terms.

## WHO SHOULD CONSIDER INVESTING IN THE FUND?

Risk averse investors who seek

- ▶ protection against possible interest rate volatility;
- ▶ an alternative to bank deposits or money market funds that may deliver better returns;
- ▶ fast access to their money, and who don't want to commit their cash for a specific period;
- ▶ capital protection, but not long-term capital growth.

## WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 0.45% (excl. VAT) is payable.

Fund expenses that are incurred in the fund include trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.
