

WHAT IS THE FUND'S OBJECTIVE?

Active Income Plus aims to provide investors with a higher total return than traditional short duration income funds over the medium term.

WHAT DOES THE FUND INVEST IN?

Active Income Plus Fund can invest in a wide variety of yielding assets, such as cash, government and corporate bonds, inflation-linked bonds and listed property, both in South Africa and internationally.

The fund's effective exposure to property and equities is typically limited to a maximum of 10%. Total exposure to international assets will typically be limited to 25% (on both an effective exposure and SARB offshore asset capacity basis).

The fund has a flexible mandate with no prescribed maturity or duration limits for its investments or for the portfolio as a whole. The fund is mandated to use derivative instruments for efficient portfolio management purposes and can invest in other collective investment schemes.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Risk Profile

Maximum growth/ minimum income exposures

Active Income Plus is tactically managed to secure an attractive return, while protecting capital over the medium term.

Its investments are carefully researched by a large and experienced investment team and subjected to a strict risk management process. The fund is actively positioned to balance long-term strategic positions with shorter-term tactical opportunities to achieve the best possible income.

While the fund is managed in a conservative and defensive manner, it will not always outperform short-duration income funds over short periods of time. Capital losses are possible, especially in the case of negative credit events affecting underlying holdings.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The recommended investment term is 24-months and longer. The fund's exposure to growth assets like listed property and preference shares will cause price fluctuations from day to day, making it unsuitable as an alternative to a money market fund over very short investment horizons (12-months and shorter).

Given its limited exposure to growth assets, the fund is not suited as the sole holding for investment terms of longer than five years.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who

- ▶ are looking for a liquid alternative to medium-term fixed deposits (3-5 years);
- ▶ seek managed exposure to income generating investments;
- ▶ believe in the benefits of active management within the fixed interest universe;
- ▶ are looking for a conservatively managed fixed income building block for use as a component of a low to moderate risk multi-asset portfolio appropriate for funding income drawdown commitments

WHAT COSTS CAN I EXPECT TO PAY?

The annual management fee is 0.75%.

Fund expenses that are incurred in the fund include trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund.
