

The primary objective in post-retirement planning is the provision of adequate capital. The level of income you draw to sustain your desired lifestyle and the potential growth of your investment portfolio are key to ensuring that you do not exhaust retirement assets.

The Coronation Living Annuity provides post-retirement income upon retiring from your retirement fund. A suitable investment portfolio can be created from the Coronation range of unit trust funds, allowing for the annual withdrawal of between 2.5% and 17.5% of the value as income. The Coronation Living Annuity is flexible, cost-effective and transparent. It is designed to allow you the flexibility to change your level of post-retirement income annually and/or switch between investment options as your circumstances change. We do not charge initial fees, we subsidise our annual administration fee and the fees of each of the underlying unit trust funds are fully disclosed.

The underlying investment options are Coronation's range of top-performing unit trusts which have consistently delivered strong investment returns since inception. This consistency of investment performance is reflected in Coronation being awarded numerous local and international investment performance accolades.
